***Amendment/Allowance***

***Response to Amendment***

1. The following Office Action is responsive to the amendment and remarks received on March 3, 2008. Original claims 1-19 were canceled and claims 20-23 are added.

***Examiner's Amendment***

2. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it **MUST** be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with William S. Frommer (Registration number 25,506) on June 19, 2008.

The application has been amended as follows:

In claims:

Claim 21, line 1 "The image compression encoding apparatus as set forth in claim 1, Wherein" is corrected as follows:

"The image compression encoding apparatus as set forth in claim **[[1]] 20, [[W]] wherein**".

***Allowable Subject Matter***

3. Claims 1-19 were canceled.

Claims 20-23 (now renumbered as 1-4) are allowed.

4. The following is a statement of reason for the indication of allowable subject matter:

The present application provides a new image compression system with coding quantity control. Particularly, this new system comprises the following features, which the prior art taken either singly or in combination does not teach:

- a) specifying a first total code quantity that is the minimum code quantity among total code quantities which exceed the target code quantity for every one of the quantization steps of the first encoding system, based on the said calculated total code quantity and the target total code quantity of one equi-length unit (independent claims 20, 22, and 23).
- b) specifying a second total code quantity that is the maximum code quantity among total code quantities less than the target code quantity for every one of the quantization steps of the first encoding system, based on the said calculated total code quantity and the target total code quantity of one equi-length unit (independent claims 20, 22, and 23).
- c) comparing, on an encoding system selection unit basis, said code quantity of second compression system with assigned code quantity which is calculated by

using said first and second total code quantity through linear interpolation, and outputting select signal that selects encoding system with smaller code quantity (independent claims 20, 22, and 23).

Some closely related prior art references were listed previously: Jang et al. (US 6,028,896), Shoda et al. (US 2003/0053115), Hirabayashi (US 5,903,669), Kosugi (US 6,075,897), and the references cited in form PTO-1449. None of them teaches the above stated features.

5. Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
